EDUCATION

California Polytechnic State University

San Luis Obispo, CA

Bachelor of Science in Computer Science; Dean's List x1

Expected Graduation: December 2026

- **Extracurricular:** alpha Kappa Delta Phi - Web Developer, Recruitment Chair, Media Relations; Society of Women Engineers; Cal Poly Scholars

EXPERIENCE

Richemont

New York, NY

Software Engineer Intern (Technology & Client Experience) | React, Node.js, Express.js, SQL

June 2025 – present

- Designed and built a secure internal web portal in **React** with filtering, inline editing, and bulk updates to replace error-prone spreadsheet workflows, significantly streamlining data management for boutique administrators.
- Partnered with stakeholders to gather feedback, identify pain points, and shape **UX** flows, ensuring features addressed real business needs and supported smooth team adoption.
- Developed backend services in **Node.js** and **SQL Server** to reconcile employee records from a cloud **API**, improving data consistency and removing redundancy across systems.
- Implemented export pipelines to stream cleaned data to CSV/Excel with safe filename handling and SFTP-compatible formats, reducing downstream data preparation time by 80%.

Break Through Tech AI – Meta AI Studio

New York, NY | Remote

AI/ML Fellow | Python, scikit-learn, TensorFlow, Hugging Face, PyTorch, Google Colab

Apr 2025 – Present

- Engineered text features and fine-tuned **BERT** models in **Google Colab** to detect demographic bias in Reddit-based NLP datasets, supporting a Meta-sponsored research challenge on fairer AI systems.
- Applied **Hugging Face** Transformers and **PyTorch** to build reproducible pipelines for preprocessing, training, and model evaluation across thousands of samples.
- Evaluated model performance and bias using **scikit-learn**, custom fairness metrics, and classification scores; shared insights with Meta engineers through presentations and collaborative reviews.
- Collaborated with teammates and Meta mentors using **Jira**, GitHub, and Slack to coordinate development tasks and track model iterations in an agile setting.

Bloomberg

New York, NY | Remote

Tech Insights Fellow | Python

June 2025 – Aug 2025

- Selected for Bloomberg's summer fellowship program to strengthen skills in **data structures and algorithms** through workshops, mock interviews, and collaborative problem-solving with engineers.

Swing Phi — Startup

Nashville, TN | Remote

Software Engineer Intern | React, TypeScript, UI Design, Agile Development

Jan 2025 – May 2025

- Redesigned unresponsive UI by creating reusable **React** + **TypeScript** components, improving load times and visual consistency across devices.
- Collaborated with designers and backend engineers in **agile** sprints to implement new features, gaining experience in cross-functional teamwork and rapid iteration within a fast-paced startup environment.

Google Computer Science Summer Institute

Los Angeles, CA | Remote

Intern | HTML, CSS, Javascript

Jul 2022 - Aug 2022

- Collaborated with peers to develop and present a comprehensive web project using **HTML/CSS** and **JavaScript**, enhancing technical skills and teamwork in a professional setting.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, C, HTML/CSS, RISC-V Assembly, R

Web Development: React, Node.js, Next.js, Express.js, RESTful API, Tailwind CSS, Three.js, Mongoose

Frameworks & Libraries: AWS, GCP, Azure, Firebase, Prisma, TensorFlow, PyTorch, pandas, scikit-learn

Databases: MongoDB, MySQL, PostgreSQL

Tools & Operating Systems: Linux, Git, GitHub, CI/CD Pipelines, Google Colab, Jupyter Notebook

PROJECTS

TaskStars (github.com/taskStars/TaskStarsProd.git)

Next.js, React, Node.js, Express, MongoDB, Tailwind CSS

- Built an AI-assisted task management app with **Next.js**, **React**, and **Node.js**, enabling smart task suggestions, real-time collaboration, and priority tracking.
- Developed scalable **REST APIs** with **Express.js** and **MongoDB**, supporting full CRUD operations and 100+ concurrent tasks with optimized backend performance.
- Designed a responsive, accessible UI using **Tailwind CSS** and integrated **Socket.IO** for live updates, reducing user task friction and boosting engagement.

LANGUAGES

English (Native), **Cantonese** (Fluent), **Mandarin** (Fluent)
