EDUCATION

California Polytechnic State University

Bachelor of Science in Computer Science; Dean's List

San Luis Obispo, CA

Expected Graduation: December 2026

- **Extracurricular:** alpha Kappa Delta Phi - Web Developer, Recruitment Chair, Media Relations; Society of Women Engineers; Cal Poly Scholars

EXPERIENCE

Richemont

Software Engineer Intern (Technology & Client Experience) — React, Node.js, Express.js, SQL

New York, NY

June 2025 – Present

- Built full-stack employee data management portal using **React** and **Node.js**, serving 1,700+ CRC staff across 30+ global boutiques and reducing manual workflow time by 83%.
- Implemented dynamic filtering, inline editing with validation, and bulk update operations to replace manual Excel workflows and improve data accuracy for HR and boutique administrators.
- Designed RESTful APIs with **Express.js** to sync employee records from cloud services and integrated with **SQL Server** using stored procedures, reducing data inconsistencies by 90%.
- Resolved 15+ security vulnerabilities via **Snyk** analysis, implemented role-based access controls, and passed enterprise penetration testing for production deployment.
- Built automated export pipeline generating CSV and Excel files with error handling, reducing downstream data preparation time by 80%.

Break Through Tech AI – Meta AI Studio

AI/ML Fellow — Python, TensorFlow, PyTorch, Hugging Face

New York, NY — Remote

Apr 2025 – Present

- Fine-tuned **BERT** models using **PyTorch** and **Hugging Face** to detect demographic bias in Reddit NLP datasets with 10,000+ samples, achieving 85% accuracy for Meta-sponsored responsible AI research.
- Built reproducible ML pipeline using **Google Colab** GPUs with automated data loading and model checkpointing, reducing experiment setup time by 40% and enabling rapid iteration across 20+ model configurations.
- Collaborated with 7-person team using **Jira** and **GitHub** to deliver research findings to Meta AI scientists on schedule across 3 sprints.

Bloomberg

Tech Insights Fellow — Python

New York, NY — Remote

June 2025 – Aug 2025

- Selected for competitive Bloomberg fellowship to strengthen data structures and algorithms skills through technical workshops, mock interviews, and collaborative problem-solving with Bloomberg engineers.

Swing Phi — Startup

Software Engineer Intern — React, TypeScript, REST APIs

Nashville, TN — Remote

Jan 2025 – May 2025

- Developed 15+ **React** and **TypeScript** components for fintech stock trading platform including real-time price charts and portfolio dashboard, building reusable component library that reduced frontend development time by 25%.
- Integrated REST APIs for stock data retrieval, user authentication, and transaction processing with error handling and loading states for robust user experience.

SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, C, HTML/CSS

Frontend: React, Next.js, Tailwind CSS, Three.js, Socket.IO

Backend: Node.js, Express.js, RESTful APIs, MongoDB, PostgreSQL, MySQL, SQL Server

ML/AI: TensorFlow, PyTorch, scikit-learn, Hugging Face, pandas, NumPy

Tools & Cloud: Git, GitHub, Linux, AWS, GCP, Azure, Docker, CI/CD, Jupyter, Google Colab

PROJECTS

TaskStars (github.com/taskStars/TaskStarsProd.git)

Next.js, React, Node.js, Express, MongoDB, OpenAI, Socket.IO, Tailwind CSS

Aug 2024 – Oct 2024

- Built full-stack AI-powered task management app using **Next.js**, **React**, and **Node.js**, implementing intelligent task prioritization via **OpenAI** integration and JWT authentication for 50+ beta users.
- Designed RESTful APIs with **Express.js** and **MongoDB** supporting full CRUD operations, user sessions, and task relationships, achieving 40% faster response times through optimized queries handling 100+ concurrent tasks.
- Developed responsive UI with **Tailwind CSS** and integrated **Socket.IO** for real-time collaboration, deploying to production using Vercel and Railway.
