EDUCATION

California Polytechnic State University

San Luis Obispo, CA

Bachelor of Science in Computer Science; Dean's List *x1*

Expected Graduation: December 2026

- **Extracurricular:** alpha Kappa Delta Phi - Web Developer, Recruitment Chair, Media Relations; Society of Women Engineers; Cal Poly Scholars

EXPERIENCE

Richemont

New York, NY

Software Engineer Intern (Technology & Client Experience) | React, Node.js, Express.js, SQL

June 2025 – present

- Built a secure internal web portal in **React** with filtering, inline editing, and bulk updates, replacing error-prone spreadsheet workflows and reducing data management time by 70% for boutique administrators.
- Designed comprehensive **UX flows** and optimized approval logic with **stakeholders**, improving workflow efficiency and driving adoption across 32+ boutiques.
- Developed scalable backend services in **Node.js** and **SQL Server** to reconcile employee records from a cloud **API**, eliminating redundant data and improving synchronization accuracy by 90%.
- Implemented automated export pipelines to generate cleaned **CSV/Excel** files with safe filename handling and **SFTP**-compatible formats, reducing downstream data preparation time by 80%.

Break Through Tech AI – Meta AI Studio

New York, NY | Remote

AI/ML Fellow | Python, scikit-learn, TensorFlow, Hugging Face, PyTorch, Google Colab

Apr 2025 – Present

- Engineered text features and fine-tuned **BERT** models in **Google Colab** to detect demographic bias in Reddit-based NLP datasets, contributing to more consistent bias detection for a Meta-sponsored research challenge on fairer AI systems.
- Applied **Hugging Face** Transformers and **PyTorch** to build reproducible pipelines for preprocessing, training, and evaluation across thousands of samples, improving experiment reliability and development speed.
- Collaborated with teammates and Meta mentors using **Jira**, **GitHub**, and **Slack** to coordinate tasks and track model iterations, ensuring smooth progress in an agile setting.

Bloomberg

New York, NY | Remote

Tech Insights Fellow | Python

June 2025 – Aug 2025

- Selected for Bloomberg's summer fellowship program to strengthen skills in **data structures and algorithms** through workshops, mock interviews, and collaborative problem-solving with engineers.

Swing Phi — Startup

Nashville, TN | Remote

Software Engineer Intern | React, TypeScript, UI Design, Agile Development

Jan 2025 – May 2025

- Implemented production-ready **React** + **TypeScript** components from UX mockups, improving development efficiency and ensuring consistent user experience across features.
- Collaborated with designers and backend engineers in **agile** sprints to ship new features ahead of schedule, enhancing cross-team coordination and accelerating product delivery.

Google Computer Science Summer Institute

Los Angeles, CA | Remote

Intern | HTML, CSS, Javascript

Jul 2022 - Aug 2022

- Collaborated with peers to develop and present a comprehensive web project using **HTML/CSS** and **JavaScript**, enhancing technical skills and teamwork in a professional setting.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, C, HTML/CSS, RISC-V Assembly, R

Web Development: React, Node.js, Next.js, Express.js, RESTful API, Tailwind CSS, Three.js, Mongoose

Frameworks & Libraries: AWS, GCP, Azure, Firebase, Prisma, TensorFlow, PyTorch, pandas, scikit-learn

Databases: MongoDB, MySQL, PostgreSQL

Tools & Operating Systems: Linux, Git, GitHub, CI/CD Pipelines, Google Colab, Jupyter Notebook

PROJECTS

TaskStars (github.com/taskStars/TaskStarsProd.git)

Next.js, React, Node.js, Express, MongoDB, Tailwind CSS

- Built an AI-assisted task management app with **Next.js**, **React**, and **Node.js**, enabling smart task suggestions, real-time collaboration, and priority tracking for 200+ active users.
- Developed scalable **REST APIs** with **Express.js** and **MongoDB**, supporting full CRUD operations and handling over 100 concurrent tasks with 40% faster response times.
- Designed a responsive, accessible UI using **Tailwind CSS** and integrated **Socket.IO** for live updates, improving user engagement and reducing task completion friction by 25%.
